

5AM SOLUTIONS MAKES EMPLOYEE-DIRECTED CHARITABLE CONTRIBUTION

Five charities receive 5% of company's net income

Reston, VA, October 20, 2007 – 5AM Solutions, an emerging life science software engineering firm, today announced the donation of five per cent of its net income to a group of charities selected by its employees.

In 2005, the company envisioned sharing its prospective good fortune in two ways. First, it was decided that the company would allocate one per cent of each employee's time to be spent volunteering for the service of others with entities of the employee's choosing. Second, the company would donate five per cent of its net income to charities suggested by its employees and directed by a company wide vote.

FY 2006 marked the company's first year of positive net income. Employees nominated charities to receive the donation, and voting by employees determined the distribution of the roughly \$11,000 in contributions.

The company is pleased to support the American Cancer Society (www.cancer.org/), the Electronic Frontier Foundation (www.eff.org), Save the Children (www.savethechildren.org), the Juvenile Diabetes Research Foundation (www.jdrf.org); and the endowment of a Kiva fund to finance entrepreneurs worldwide (www.kiva.org).

Said Todd Parnell, a 5AM employee who nominated EFF to receive the company's contribution, "It just makes sense for a group of engineers to support a nonprofit group of passionate lawyers, technologists, volunteers, and visionaries to protect our digital rights. I'm glad we can and do give back."

Brent Gendleman, 5AM CEO and President, concurred, saying "5AM is in the business of becoming the provider, employer and investment of choice for software in the life sciences. As such, we understand that achieving those goals require us to contribute to the communities we live in, serve and build. Our projections for 2007 look even better and we look forward to announcing what we will give next year."

About 5AM Solutions

5AM Solutions builds software targeting life science companies which view data organization, work-flow optimization, analysis, and global collaboration as key components of their success. Our web solutions grant insight into the complex data produced by the genomic revolution integrated with the directed collection of clinical data across geography, discipline and IT disparities found among collaborators around the globe or down the hall. An IBM Life Sciences Optimized partner, we share a common passion with our clients to advance medicine and science through our contribution of software that works, Software for Life™. www.5amsolutions.com
