5AM SOLUTIONS FOUNDING PARTNER AUTHORS BOOK ON CONTINUOUS INTEGRATION

Continuous Integration: Improving Software Quality and Reducing Risk Brings Theory into Real-World Practice

Reston, VA, June 29, 2007 – 5AM Solutions, a life science software engineering firm, today announced the publication of *Continuous Integration: Improving Software Quality and Reducing Risk*, by Addison-Wesley Professional Martin Fowler Signature Series. The book, authored by Paul Duvall, 5AM Founding Partner Steve Matyas and Andrew Glover, provides readers with practical and authoritative information on one of the latest trends in software development, continuous integration to promote quality.

Continuous Integration introduces the concept of continuous integration (CI) and details practical uses of the tools and practices that can allow development teams to deliver production-ready software, everyday. The book includes more than 40 CI-related practices, and examples of the application of these practices.

“*Continuous Integration* provides software developers guidance that is more than just theory – they can put the CI tenets into practice,” said Brent Gendleman, CEO of 5AM Solutions. “5AM Solutions seeks to be the provider of choice in the life science software industry, and employs CI practices to provide our clients with information they need on the progress of their software projects. Steve and his co-authors use CI principles every day – we were thrilled that these efforts led to the book.”

For more information, visit the book’s companion web site, <http://www.integratebutton.com>. A sample chapter is available at <http://www.awprofessional.com/title/0321336380>. The book is available through major chain and independent booksellers worldwide and through online vendors at a suggested retail price of US \$44.99.

###

About The Authors

5AM’s Founding Partner, Steve Matyas, is a practitioner of eXtreme Programming (XP), Agile, and the Rational Unified Process (RUP). Much of his professional hands-on experience has been in the Java/J2EE custom software development and services industry with a specialization in methodologies, object technology, and process improvement. He also is a contributing author of UML 2 Toolkit, a J. Wiley & Sons publication, and an instructor of Java Web Development. Paul Duvall authors a series for IBM developerWorks called Automation for the People and is a coauthor of the NFJS 2007 Anthology (Pragmatic Programmers, 2007), and is a contributing author of UML 2 Toolkit (Wiley, 2003). Andrew Glover is the co-author of Groovy in Action (Manning, 2007), Java Testing Patterns (Wiley, 2004), and the NFJS 2006 Anthology (Pragmatic Programmers, 2006). He also is the author of multiple online publications including IBM’s developerWorks and O’Reilly’s ONJava, ONLamp, and Dev2Dev portals.

About 5AM Solutions

5AM Solutions builds software targeting life science companies which view data organization, work-flow optimization, analysis, and global collaboration as key components of their success. Our web solutions grant insight into the complex data produced by the genomic revolution integrated with the directed collection of clinical data across geography, discipline and IT disparities found among collaborators around the globe or down the hall. An IBM Life Sciences Optimized partner, we share a common passion with our clients to advance medicine and science through our contribution of software that works, Software for Life™. www.5amsolutions.com
